DHAKA,BANGLADESH

Website: https://abdullahalkafi.vercel.app/

PROFILE

Passionate and detail-oriented Computer Science & Engineering graduate (2025) specializing in Python, Django, and Django REST Framework. Hands-on experience in building scalable backend web applications, RESTful APIs,JWT/OAuth2 authentication, and third-party API integrations (e.g., SSLCommerz payment gateway). Proficient in API documentation using Swagger UI and clean data modeling. Eager to contribute to a collaborative engineering team as a Junior Django Developer.

EDUCATION

2021-2025

DAFFODIL INTERNATIONAL UNIVERSITY, BANGLADESH

Computer Science &Engineering
GPA:3.12/4.0

TECHNICAL SKILLS

- **Backend Frameworks:** Django, Django REST Framework (DRF)
- **Core Languages:** Python, JavaScript (Basic)
- **Web Technologies:** HTML5, CSS3, JavaScript
- **APIs & Security:** RESTful APIs, JWT Authentication, OAuth2, Swagger Documentation
- **Tools & Databases:** Git & GitHub, Postman, VS Code, SQL Basics

LANGUAGES

- Bangla:Native
- English:ProfessionalWorkingProficiency

HOBBIES & INTERESTS

- Playing Football
- Playing Chess
- Problem Solving

KEYPROJECTS

Primary School Management System (Large-scale Django Web Application)

- Engineered a comprehensive web platform for school administration featuring student list management, student results, and attendance tracking modules.
- Implemented complete academic curriculum workflows and an interactive Teacher Portal for seamless grade and resource management.

Boi Poka - Online Book Store (Django Web Application)

- Built an interactive online bookstore platform where users can browse, search, and select books.
- Developed full e-commerce features allowing users to select books and complete purchases.

Task Management System (Django Web Application)

- Created a web application designed for assigning, viewing, and submitting tasks with real-time status updates.

E-Commerce REST API (Django REST Framework)

- Developed a production-ready RESTful E-Commerce API featuring full SSLCommerz payment gateway integration.
- Designed endpoints for shopping cart management, order processing, and payment flows with Swagger documentation.

Blog Application API (Django REST Framework)

- Built a blogging platform API using nested serializers for structured post and comment interactions.
- Integrated JWT authentication to secure endpoints and manage user sessions efficiently.
